

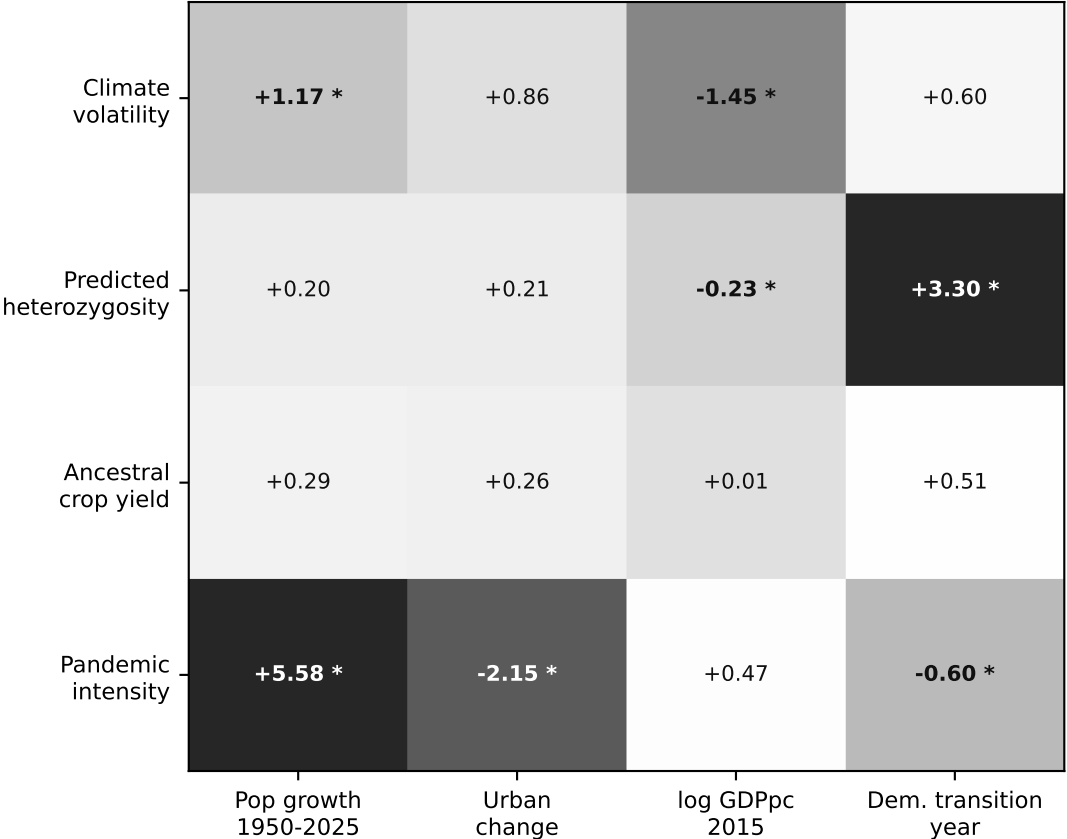

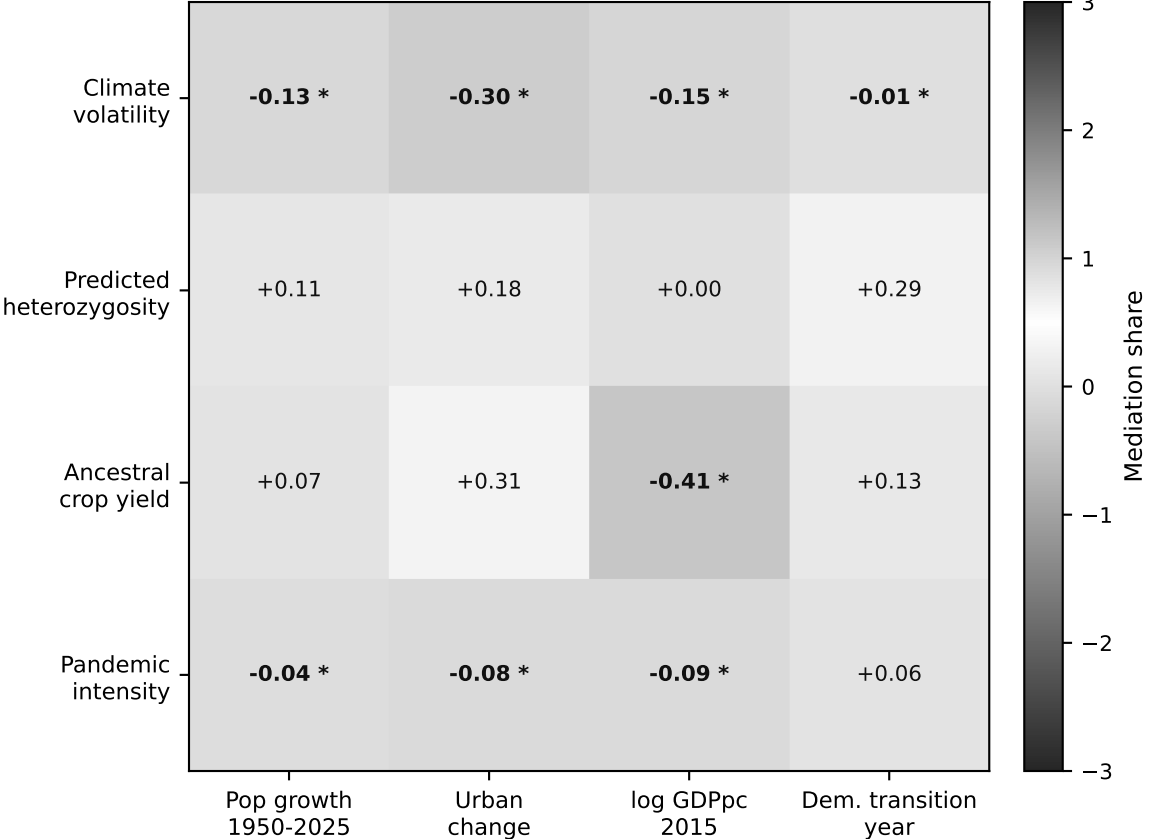

Figure 5 — Mediation-share robustness: pathway-source comparison
4 substrates × 4 modern outcomes

Climate-only-clustered pathways (Exercise 2)
Mediator: K = 5 on climate primitives

* = mediation share outside [0,1] (suppressor / amplifier effect).
Outside [0,1]: 7/16 (44%)
Median |share|: 0.556

HYDE-features-clustered pathways (Exercise 3)
Mediator: K = 5 on HYDE trajectory outcomes

* = mediation share outside [0,1] (suppressor / amplifier effect).
Outside [0,1]: 8/16 (50%)
Median |share|: 0.117
