

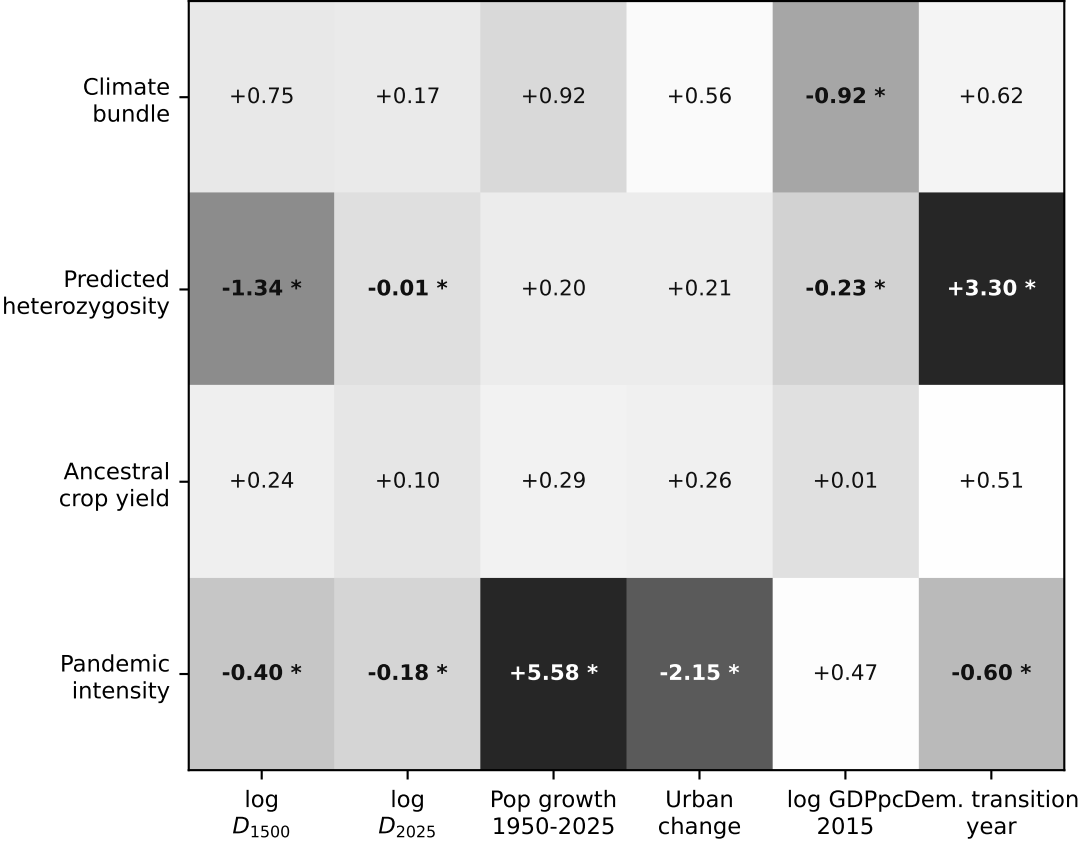

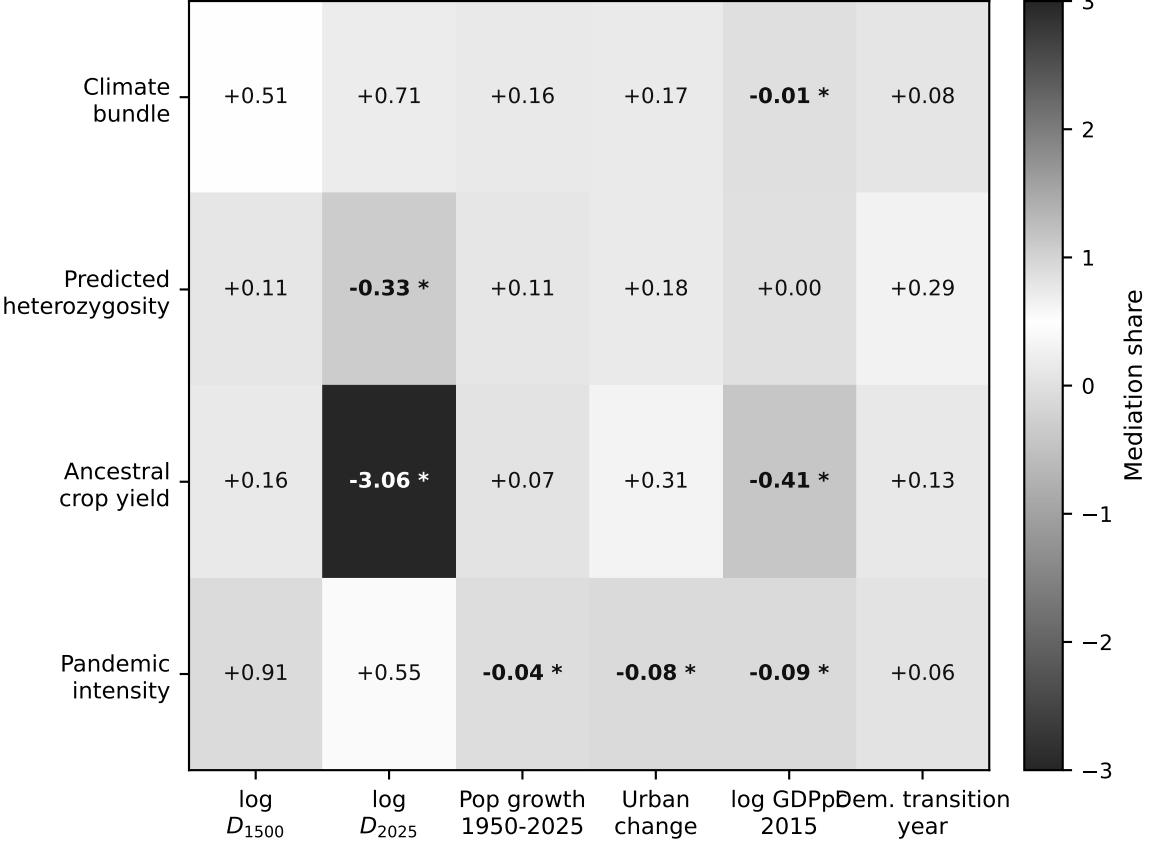

Figure 5 — Mediation-share robustness: pathway-source comparison
4 substrates × 4 modern outcomes

Climate-only-clustered pathways (Exercise 2)
Mediator: K = 5 on climate primitives

* = mediation share outside [0, 1] (suppressor / amplifier effect). Gray scale clipped to [-3, 3]; raw values annotated.
Outside [0, 1]: 10/24 (42%)
Median |share|: 0.436

HYDE-features-clustered pathways (Exercise 3)
Mediator: K = 5 on HYDE trajectory outcomes

* = mediation share outside [0, 1] (suppressor / amplifier effect). Gray scale clipped to [-3, 3]; raw values annotated.
Outside [0, 1]: 7/24 (29%)
Median |share|: 0.162
